

UTXOPET

A digital world of NFT pet collectibles
created on the Cardano blockchain

UTXOPet Whitepaper

Prepared by:
Founders of UTXOPet

2022

Executive Summary

This whitepaper will evolve over time and serves to provide our community with a source of information about the mission of the UTXOPet brand and will be a useful resource for members to refer back to.

Each UTXOPet is a metaverse ready NFT character with a completely unique fur pattern and is grouped into one of 7 factions based on the color theme of its fur pattern.

After the NFT sale has concluded we will begin securing a place in the Pavia metaverse which in time will act as a gateway to access the UTXOPet metaverse experience which is intended to be #collaborative, #inclusive... and #fun.

The UTXOPet metaverse will consist of lands to be explored and worked on... and hidden in several places on and off the map will be vital clues and challenges to solve and complete for those interested in the hunt.

Homes will each be unique and will form a vital part of each UTXOPet's metaverse experience... and will require a free NFT to unlock their full potential.

A maximum supply of 1 billion UTXOPet tokens will be minted and 100% of these tokens will be distributed to the UTXOPet community.

A second free NFT will illuminate a new path in every UTXOPet's life...
